

Recombinant Human CACNB1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CACNB1-6188H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CACNB1 MS Standard C13 and N15-labeled recombinant protein (NP_000714) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene belongs to the calcium channel beta subunit family. It plays an important role in the calcium channel by modulating G protein inhibition, increasing peak calcium current, controlling the alpha-1 subunit membrane targeting and shifting the voltage dependence of activation and inactivation. Alternative splicing occurs at this locus and three transcript variants encoding three distinct isoforms have been identified.
Molecular Mass	65.5 kDa
