

Recombinant Human AURKA Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. AURKA-6210H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AURKA MS Standard C13 and N15-labeled recombinant protein (NP_940835) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene is a cell cycle-regulated kinase that appears to be involved in microtubule formation and/or stabilization at the spindle pole during chromosome segregation. The encoded protein is found at the centrosome in interphase cells and at the spindle poles in mitosis. This gene may play a role in tumor development and progression. A processed pseudogene of this gene has been found on chromosome 1, and an unprocessed pseudogene has been found on chromosome 10. Multiple transcript variants encoding the same protein have been found for this gene.
