

Recombinant Human RTKN Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. RTKN-6216H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	RTKN MS Standard C13 and N15-labeled recombinant protein (NP_149035) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a scaffold protein that interacts with GTP-bound Rho proteins. Binding of this protein inhibits the GTPase activity of Rho proteins. This protein may interfere with the conversion of active, GTP-bound Rho to the inactive GDP-bound form by RhoGAP. Rho proteins regulate many important cellular processes, including cytokinesis, transcription, smooth muscle contraction, cell growth and transformation. Dysregulation of the Rho signal transduction pathway has been implicated in many forms of cancer. Alternative splicing results in multiple transcript variants encoding different isoforms.
Molecular Mass	61.2 kDa

Purity > 80% as determined by SDS-PAGE and Coomassie blue staining

Stability Stable for 3 months from receipt of products under proper storage and handling conditions.

Storage Store at -80 centigrade. Avoid repeated freeze-thaw cycles.

Concentration 50 µg/mL as determined by BCA

Storage Buffer 100 mM glycine, 25 mM Tris-HCl, pH 7.3.

GENE INFORMATION

Gene Name RTKN rhotekin [Homo sapiens (human)]

Official Symbol RTKN

Synonyms RTKN; rhotekin; rhotekin

Gene ID 6242

mRNA Refseq NM_033046

Protein Refseq NP_149035
