

Recombinant Human COLEC11 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. COLEC11-6223H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	COLEC11 MS Standard C13 and N15-labeled recombinant protein (NP_954705) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the collectin family of C-type lectins that possess collagen-like sequences and carbohydrate recognition domains. Collectins are secreted proteins that play important roles in the innate immune system by binding to carbohydrate antigens on microorganisms, facilitating their recognition and removal. The encoded protein binds to multiple sugars with a preference for fucose and mannose. Mutations in this gene are a cause of 3MC syndrome-2. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
