

Recombinant Human PCOLCE Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. PCOLCE-6411H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PCOLCE MS Standard C13 and N15-labeled recombinant protein (NP_002584) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Fibrillar collagen types I-III are synthesized as precursor molecules known as procollagens. These precursors contain amino- and carboxyl-terminal peptide extensions known as N- and C-propeptides, respectively, which are cleaved, upon secretion of procollagen from the cell, to yield the mature triple helical, highly structured fibrils. This gene encodes a glycoprotein which binds and drives the enzymatic cleavage of type I procollagen and heightens C-proteinase activity.
