

Recombinant Human PITPNM3 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. PITPNM3-6484H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PITPNM3 MS Standard C13 and N15-labeled recombinant protein (NP_112497) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of a family of membrane-associated phosphatidylinositol transfer domain-containing proteins. The calcium-binding protein has phosphatidylinositol (PI) transfer activity and interacts with the protein tyrosine kinase PTK2B (also known as PYK2). The protein is homologous to a Drosophila protein that is implicated in the visual transduction pathway in flies. Mutations in this gene result in autosomal dominant cone dystrophy. Multiple transcript variants encoding different isoforms have been found for this gene.
Molecular Mass	106.6 kDa

Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Stability	Stable for 3 months from receipt of products under proper storage and handling conditions.
Storage	Store at -80 centigrade. Avoid repeated freeze-thaw cycles.
Concentration	50 µg/mL as determined by BCA
Storage Buffer	100 mM glycine, 25 mM Tris-HCl, pH 7.3.

GENE INFORMATION

Gene Name	PITPNM3 PITPNM family member 3 [Homo sapiens (human)]
Official Symbol	PITPNM3
Synonyms	PITPNM3; PITPNM family member 3; membrane-associated phosphatidylinositol
