

Recombinant Human MAGEA3 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. MAGEA3-6580H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	MAGEA3 MS Standard C13 and N15-labeled recombinant protein (NP_005353) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene is a member of the MAGEA gene family. The members of this family encode proteins with 50 to 80% sequence identity to each other. The promoters and first exons of the MAGEA genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEA genes are clustered at chromosomal location Xq28. They have been implicated in some hereditary disorders, such as dyskeratosis congenita.
