

## Recombinant Mouse Olm4, His-tagged

Cat. No. Olm4-9170M    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Mouse Olm4 protein, fused to His-tag, was expressed in HEK293F cells and purified by His-tag affinity columns.                                                                                                                    |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                         |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                        |
| <b>ProteinLength</b>    | 538 amino acids                                                                                                                                                                                                                               |
| <b>Molecular Mass</b>   | The theoretical Molecular Weight of the recombinant protein (approximate): 61 kDa.<br>In SDS-PAGE under reducing conditions, the apparent molecular mass of recombinant mouse OLFM4 is approximately 6570 kDa due to different glycosylation. |

### GENE INFORMATION

|                        |                                                              |
|------------------------|--------------------------------------------------------------|
| <b>Gene Name</b>       | Olm4 olfactomedin 4 [ Mus musculus ]                         |
| <b>Official Symbol</b> | Olm4                                                         |
| <b>Synonyms</b>        | OLFM4; olfactomedin 4; GC1; OlfD; pPD4; GW112; Gm296; Gm913; |
| <b>Gene ID</b>         | 239192                                                       |
