

## Recombinant Litomosoides sigmodontis thioredoxin peroxidase, His-tagged

Cat. No. tpx-01L    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                    |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Litomosoides sigmodontis thioredoxin peroxidase was expressed with a polyhistidine tag in E.coli.                      |
| <b>Species</b>          | Litomosoides sigmodontis                                                                                                           |
| <b>Source</b>           | E.coli                                                                                                                             |
| <b>Form</b>             | 25mM Tris-HCl, pH7.4, 250mM NaCl, 2mM DTT                                                                                          |
| <b>Molecular Mass</b>   | ~33kDa                                                                                                                             |
| <b>Purity</b>           | >92% as determined by SDS-PAGE                                                                                                     |
| <b>Storage</b>          | Store it at +4°C, Long Term Storage at -20°C. After reconstitution, prepare aliquots and store at -20°C. Avoid freeze/thaw cycles. |
