

## Recombinant Mouse Fbxo44 Protein, Myc/DDK-tagged

**Cat. No.** Fbxo44-2972M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Purified recombinant protein of mouse full-length F-box protein 44 (cDNA clone MGC:19308 IMAGE:4165174), complete cds, with C-terminal MYC/DDK tag, expressed in HEK293T cells. |
| <b>Species</b>          | Mouse                                                                                                                                                                           |
| <b>Source</b>           | HEK293                                                                                                                                                                          |
| <b>Description</b>      | Substrate-recognition component of the SCF (SKP1-CUL1-F-box protein)-type E3 ubiquitin ligase complex.                                                                          |
| <b>Molecular Mass</b>   | 24.8 kDa                                                                                                                                                                        |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                                     |
| <b>Stability</b>        | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.                                   |
| <b>Storage</b>          | Store at -80 centigrade after receiving vials.                                                                                                                                  |
| <b>Concentration</b>    | >50 µg/mL as determined by microplate BCA method                                                                                                                                |
| <b>Storage Buffer</b>   | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                                                                           |
