| <b>Product Overview</b> | Purified recombinant protein of mouse full-length pleckstrin homology domain containing, family M (with RUN domain) member 1 (Plekhm1), with C-terminal MYC/DDK tag, expressed in HEK293T cells.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Description</b>      | Proposed to act as a multivalent adapter protein that regulates Rab7-dependent and HOPS complex-dependent fusion events in the endolysosomal system and couples autophagic and the endocytic trafficking pathways. Required for late stages of endolysosomal maturation, facilitating both endocytosis-mediated degradation of growth factor receptors and autophagosome clearance. Seems to be involved in the terminal maturation of autophagosomes and to mediate autophagosome-lysosome fusion Positively regulates lysosome peripheral distribution and ruffled border formation in osteoclasts May be involved in negative regulation of endocytic transport from early endosome to late endosome/lysosome implicating its association with Rab7. May have a role in sialyl-lex-mediated transduction of apoptotic signals. Involved in bone resorption |
| <b>Molecular Mass</b>   | 118.5 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Stability</b>        | Stable for 12 months from the date of receipt of the product under proper storage and                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

handling conditions. Avoid repeated freeze-thaw cycles.

**Storage** Store at -80 centigrade after receiving vials.

**Concentration** >50 µg/mL as determined by microplate BCA method

**Storage Buffer** 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.

## GENE INFORMATION

**Gene Name** Plekhm1 pleckstrin homology domain containing, family M (with RUN domain) member 1 [ *Mus musculus* (house mouse) ]

**Official Symbol** [Plekhm1](#)

**Synonyms** PLEKHM1; pleckstrin homology domain containing, family M (with RUN domain) member 1; pleckstrin homology domain-containing family M member 1; PH domain-containing family M member 1; B2; AP162; BC038943; D330036J23Rik

**Gene ID** [353047](#)

**mRNA Refseq** [NM\\_183034](#)

**Protein Refseq** [NP\\_898855](#)

**UniProt ID** [Q7TSI1](#)
