

## Recombinant Mouse Reep2 Protein, Myc/DDK-tagged

**Cat. No.** Reep2-5450M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Purified recombinant protein of mouse full-length receptor accessory protein 2 (Reep2), with C-terminal MYC/DDK tag, expressed in HEK293T cells. |
| <b>Species</b>          | Mouse                                                                                                                                            |
| <b>Source</b>           | HEK293                                                                                                                                           |
| <b>Description</b>      | Required for endoplasmic reticulum (ER) network formation, shaping and remodeling. May enhance the cell surface expression of odorant receptors. |
| <b>Molecular Mass</b>   | 28.4 kDa                                                                                                                                         |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                      |
| <b>Stability</b>        | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.    |
| <b>Storage</b>          | Store at -80 centigrade after receiving vials.                                                                                                   |
| <b>Concentration</b>    | >50 µg/mL as determined by microplate BCA method                                                                                                 |
| <b>Storage Buffer</b>   | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                                            |
