

## Recombinant Mouse Scyl3 Protein, Myc/DDK-tagged

**Cat. No.** Scyl3-5727M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                          |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Purified recombinant protein of mouse full-length SCY1-like 3 ( <i>S. cerevisiae</i> ) (Scyl3), with C-terminal MYC/DDK tag, expressed in HEK293T cells. |
| <b>Species</b>          | Mouse                                                                                                                                                    |
| <b>Source</b>           | HEK293                                                                                                                                                   |
| <b>Description</b>      | May play a role in regulating cell adhesion/migration complexes in migrating cells.                                                                      |
| <b>Molecular Mass</b>   | 81.3 kDa                                                                                                                                                 |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                              |
| <b>Stability</b>        | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.            |
| <b>Storage</b>          | Store at -80 centigrade after receiving vials.                                                                                                           |
| <b>Concentration</b>    | >50 µg/mL as determined by microplate BCA method                                                                                                         |
| <b>Storage Buffer</b>   | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                                                    |

### GENE INFORMATION

|                  |                                                                                  |
|------------------|----------------------------------------------------------------------------------|
| <b>Gene Name</b> | Scyl3 SCY1-like 3 ( <i>S. cerevisiae</i> ) [ <i>Mus musculus</i> (house mouse) ] |
