

Recombinant Mouse Stk10 Protein, Myc/DDK-tagged

Cat. No. Stk10-6181M Lot. No. (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of mouse full-length serine/threonine kinase 10 (Stk10), with C-terminal MYC/DDK tag, expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	This gene encodes a member of the Ste20 family of serine/threonine protein kinases, and is similar to several known polo-like kinase kinases. Mice deficient for this gene product are viable, but exhibit altered integrin-mediated lymphocyte adhesion characteristics. The orthologous gene product in humans can associate with and phosphorylate polo-like kinase 1, and overexpression of a kinase-dead version of the protein interferes with normal cell cycle progression.
Molecular Mass	111.9 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Stability	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
Storage	Store at -80 centigrade after receiving vials.
Concentration	>50 µg/mL as determined by microplate BCA method

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Storage Buffer 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.

GENE INFORMATION

Gene Name Stk10 serine/threonine kinase 10 [Mus musculus (house mouse)]

Official Symbol Stk10

Synonyms STK10; serine/threonine kinase 10; serine/threonine-protein kinase 10; germ cell kinase 1; lymphocyte-oriented kinase; Lok; Gek1; mKIAA4026; KIAA4026

Gene ID 20868

mRNA Refseq NM_009288

Protein Refseq NP_033314

UniProt ID O55098
