

Recombinant Mouse Tlr4 Protein, Myc/DDK-tagged

Cat. No. Tlr4-6453M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of mouse full-length toll-like receptor 4 (Tlr4), with C-terminal MYC/DDK tag, expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	<p>This gene belongs to the evolutionarily-conserved Toll-like receptor family, whose members are type-1 transmembrane proteins that are involved in innate immunity. Toll-like receptors are characterized by an extracellular leucine-rich repeat domain that functions in ligand recognition and an intracellular toll/interleukin-1 receptor-like domain that is crucial for signal transduction. The receptor encoded by this gene mediates the innate immune response to bacterial lipopolysaccharide, a major component of the outer membrane of Gram-negative bacteria, through synthesis of pro-inflammatory cytokines and chemokines. In addition, this protein can recognize other pathogens from Gram-negative and Gram-positive bacteria as well as viral components. Mice deficient in this gene display a number of immune response-related phenotypes including hyporesponsiveness to bacterial lipopolysaccharide and increased levels of respiratory syncytial virus compared to controls. [provided by RefSeq, Sep 2015]</p>
Molecular Mass	96 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining

Stability	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
Storage	Store at -80 centigrade after receiving vials.
Concentration	>50 µg/mL as determined by microplate BCA method
Storage Buffer	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.

GENE INFORMATION

Gene Name	Tlr4 toll-like receptor 4 [<i>Mus musculus</i> (house mouse)]
Official Symbol	Tlr4
Synonyms	TLR4; toll-like receptor 4; lipopolysaccharide response; Lps; Ly87; Ran/M1; Rasl2-8
Gene ID	21898
mRNA Refseq	NM_021297
Protein Refseq	NP_067272
UniProt ID	Q9QUK6
