

Recombinant Mouse Wdr83 Protein, Myc/DDK-tagged

Cat. No. Wdr83-6988M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Mouse WD repeat domain containing 83 (Wdr83), with C-terminal MYC/DDK tag, expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	Molecular scaffold protein for various multimeric protein complexes. Involved in response to hypoxia by acting as a negative regulator of HIF1A/HIF-1-alpha via its interaction with EGLN3/PHD3. May promote degradation of HIF1A. May act by recruiting signaling complexes to a specific upstream activator. Also acts as a module in the assembly of a multicomponent scaffold for the ERK pathway, linking ERK responses to specific agonists. At low concentrations it enhances ERK activation, whereas high concentrations lead to the inhibition of ERK activation. May also be involved in pre-mRNA splicing.
Molecular Mass	34.4 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Stability	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
Storage	Store at -80 centigrade after receiving vials.

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Concentration >50 µg/mL as determined by microplate BCA method

Storage Buffer 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.

GENE INFORMATION

Gene Name Wdr83 WD repeat domain containing 83 [*Mus musculus* (house mouse)]

Official Symbol Wdr83

Synonyms Wdr83; WD repeat domain containing 83; Mor; Morg1; 1500041N16Rik; WD repeat domain-containing protein 83; MAPK cascade scaffold protein; MAPK organizer 1; mitogen-activated protein kinase organizer 1

Gene ID 67836

mRNA Refseq NM_026399

Protein Refseq NP_080675

UniProt ID Q9DAJ4
