

Recombinant Mouse Zp2 Protein, Myc/DDK-tagged

Cat. No. Zp2-7123M Lot. No. (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Mouse zona pellucida glycoprotein 2 (Zp2), with C-terminal MYC/DDK tag, expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	This gene encodes a member of the zona pellucida family of glycoproteins that play an important role in the survival of growing oocytes, successful fertilization and the passage of early embryos through the oviduct. The encoded preproprotein undergoes proteolytic processing to generate the mature polypeptide that is incorporated into the extracellular matrix surrounding mouse oocytes. Mice lacking the encoded protein develop defective zonae pellucidae that disrupt folliculogenesis, fertility and development. [provided by RefSeq, Sep 2016]
