

Recombinant Human LIPG Protein, His-tagged

Cat. No. LIPG-16H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	LIPG Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 343 amino acids (21-340) and having a molecular mass of 38 kDa. LIPG is fused to a 23 amino acid His-tag at N-terminus and purified by proprietary chromatographic techniques.
Species	Human
Source	E.coli
ProteinLength	21-340
Description	The protein encoded by this gene has substantial phospholipase activity and may be involved in lipoprotein metabolism and vascular biology. This protein is designated a member of the TG lipase family by its sequence and characteristic lid region which provides substrate specificity for enzymes of the TG lipase family.
