

Native Chlamydia abortus Antigen

Cat. No. C. abortus-35 **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Chlamydia abortus Antigen
Species	C.abortus
Source	Vero
Description	Enzootic abortion of ewes (EAE) is caused by Chlamydia (Chlamydophila) abortus and is one of the most common abortifacient microbes in sheep. It occurs in all sheep-producing countries and produces late-term abortion. It occurs in two forms: outbreaks when first introduced into susceptible flocks or as an enzootic condition of ewe lambs.
Form	Liquid
Applications	CFT and SDS-PAGE
Stability	12 months
Storage	Store at -80 centigrade, avoid freeze/thaw cycles.
Storage Buffer	phosphate buffered saline pH 7.5.
Preservative	None
