

Recombinant Human JMJD6 Protein, GST-tagged

Cat. No. JMJD6-109H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant N-terminal GST-tagged full length human JMJD6 protein (2-403) was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	2-403
Description	This gene encodes a nuclear protein with a JmjC domain. JmjC domain-containing proteins are predicted to function as protein hydroxylases or histone demethylases. This protein was first identified as a putative phosphatidylserine receptor involved in phagocytosis of apoptotic cells; however, subsequent studies have indicated that it does not directly function in the clearance of apoptotic cells, and questioned whether it is a true phosphatidylserine receptor. Multiple transcript variants encoding different isoforms have been found for this gene.
Molecular Mass	73.2 kDa
Purity	~50% estimated by SDS-PAGE
Stability	≥ 6 months
Storage	At -80 centigrade.
