

# Recombinant Human C1orf223, His-tagged

**Cat. No.** C1orf223-10460H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human C1orf223 protein, fused to His-tag, was expressed in E.coli and purified by Ni-sepharose.                                                          |
| <b>Species</b>          | Human                                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                               |
| <b>ProteinLength</b>    | 23-206a.a.                                                                                                                                                           |
| <b>Storage</b>          | The protein is stored in PBS buffer at -20°C. Avoid repeated freezing and thawing cycles.                                                                            |
| <b>Storage Buffer</b>   | 1M PBS (58mM Na <sub>2</sub> HPO <sub>4</sub> , 17mM NaH <sub>2</sub> PO <sub>4</sub> , 68mM NaCl, pH8. ) added with 300mM Imidazole and 0.7% Sarcosyl, 15%glycerol. |

## GENE INFORMATION

|                        |                                                                                                                                                                                    |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | TEX38 testis expressed 38 [ Homo sapiens (human) ]                                                                                                                                 |
| <b>Official Symbol</b> | TEX38                                                                                                                                                                              |
| <b>Synonyms</b>        | THEG4; C1orf223; ATPAF1-AS1; testis-expressed sequence 38 protein; ATPAF1 antisense gene protein 1; testis highly expressed protein 4; ATPAF1 antisense RNA 1 (non-protein coding) |
