

Active Recombinant Human WNT8A Protein

Cat. No. WNT8A-123H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The mature recombinant human Wnt-8a protein containing 337aa (V25-A351) without tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	The WNT gene family consists of structurally related genes which encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. This gene is a member of the WNT gene family, and may be implicated in development of early embryos as well as germ cell tumors. Multiple alternatively spliced transcript variants have been found for this gene.
Bio-activity	Measured by its ability to induce alkaline phosphatase production by C3H10T1/2 mouse embryonic fibroblast cells. The ED50 for this effect is 0.5-2.5 µg/mL.
Molecular Mass	38.7 kDa
Product-Related Proteins	25-351
Storage	At -80 centigrade. Avoid repeated freeze-thaw cycles.
Storage Buffer	PBS
