

# Recombinant Human NRROS protein, His&Myc-tagged

**Cat. No.** NRROS-2327H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>Product Overview</b> | Recombinant Human NRROS protein(Q86YC3)(19-650aa), fused to N-terminal His tag and C-terminal Myc tag, was expressed in Insect Cell.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**Purity**

Greater than 90% as determined by SDS-PAGE.

**Storage**

Store at -20°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
