

# Recombinant ASFV Ba71V-107 Full Length Transmembrane protein, His-tagged

**Cat. No.** Ba71V-107-2443A    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant ASFV Ba71V-107 protein(Q89424)(1-117aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                           |
| <b>Species</b>          | ASFV                                                                                                                                                                                                                                  |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                |
| <b>ProteinLength</b>    | 1-117aa                                                                                                                                                                                                                               |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.<br>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0. |
| <b>Molecular Mass</b>   | 19.2 kDa                                                                                                                                                                                                                              |
| <b>AA Sequence</b>      | MDTETSPLLSHNLSTREGIKQSTQGLLAHTIARYPGTTAILLGILILLVILIIVAIVYYNRS<br>VDCKSSMPKPPPSYYVQQPEPHHHFPVFFRKRKNSTSLQSHIPSDEQLAELAHS                                                                                                              |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                           |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                        |

### Reconstitution

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
