

## Recombinant Human ROR1 protein, mFc-tagged

**Cat. No.** ROR1-1820H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human ROR1 protein(Gln 30 - Glu 403)(Q01973-1), fused to mFc tag, was expressed in HEK293.                                                                         |
| <b>Species</b>          | Human                                                                                                                                                                          |
| <b>Source</b>           | HEK293                                                                                                                                                                         |
| <b>ProteinLength</b>    | Gln 30 - Glu 403                                                                                                                                                               |
| <b>Form</b>             | Lyophilized from 0.22 µm filtered solution in 50 mM Tris, 100 mM Glycine, 25 mM Arginine, 150 mM NaCl, pH7.5. Normally trehalose is added as protectant before lyophilization. |
| <b>Molecular Mass</b>   | The protein has a calculated MW of 68.9 kDa. The protein migrates as 90-100 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.                                  |
| <b>Endotoxin</b>        | Less than 0.1 EU per µg by the LAL method.                                                                                                                                     |
| <b>Purity</b>           | >95% as determined by SDS-PAGE.                                                                                                                                                |
| <b>Storage</b>          | This product is stable after storage at:<br>-20°C to -70°C for 12 months in lyophilized state;<br>-70°C for 3 months under sterile conditions after reconstitution.            |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of                                                                                       |
