

## Recombinant Human GPM6B protein, His-tagged

**Cat. No.** GPM6B-3630H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human GPM6B protein(1-62 aa), fused with N-terminal His tag, was expressed in E.coli.                                                                                                                                                                                   |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                               |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                              |
| <b>ProteinLength</b>    | 1-62 aa                                                                                                                                                                                                                                                                             |
| <b>Form</b>             | The purified protein was Lyophilized from sterile PBS (58mM Na <sub>2</sub> HPO <sub>4</sub> , 17mM NaH <sub>2</sub> PO <sub>4</sub> , 68mM NaCl, pH7.4). 5 % trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM imidazole. |
| <b>AASequence</b>       | MKPAMETAAEENTEQSQERKVNRAEMEIGRYHWMYPGSKNHQYHPVPTLGDRASPLSSPGC                                                                                                                                                                                                                       |
| <b>Purity</b>           | 85%, by SDS-PAGE with Coomassie Brilliant Blue staining.                                                                                                                                                                                                                            |
| <b>Storage</b>          | Store at 2-8°C for 1-2 weeks. Aliquot and store at -20°C to -80°C for up to 3 months, reconstitution with sterile water and addition of an equal volume of glycerol. Avoid repeat freeze-thaw cycles.                                                                               |
| <b>Reconstitution</b>   | Dissolve the product in 200 µl sterile water to achieve a working concentration of 0.25 µg/µl. If experimental compatibility allows, mix the aqueous solution with an equal volume of glycerol (1:1 ratio) after initial reconstitution.                                            |

## GENE INFORMATION

**Gene Name** GPM6B glycoprotein M6B [ Homo sapiens ]

**Official Symbol** GPM6B

**Synonyms** GPM6B; glycoprotein M6B; neuronal membrane glycoprotein M6-b; M6B; MGC17150; MGC54284; protolipid M6B;

**Gene ID** 2824

**mRNA Refseq** NM\_001001994

**Protein Refseq** NP\_001001994

**MIM** 300051

**UniProt ID** Q13491
