Recombinant Human CRLF3, GST-tagged

Cat. No. CRLF3-11584H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CRLF3 protein, fused to GST-tag, was expressed in E.coli and purified by GSH-sepharose.
Species	Human
Source	E.coli
ProteinLength	C-term-303a.a.
Description	This gene encodes a cytokine receptor-like factor that may negatively regulate cell cycle progression at the G0/G1 phase. Studies of the related rat protein suggest that it may regulate neuronal morphology and synaptic vesicle biogenesis. This gene is one of several genes located in the neurofibromatosis type I tumor suppressor region on the q arm of chromosome 17, a region that is subject to microdeletions, duplications, chromosomal breaks and rearrangements. Alternative splicing of this gene results in multiple transcript variants. Related pseudogenes have been identified on chromosomes 2 and 5.
Storage	The protein is stored in PBS buffer at -20℃. Avoid repeated freezing and thawing cycles.
Storage Buffer	1M PBS (58mM Na2HPO4,17mM NaH2PO4, 68mM NaCl, pH8.) added with 100mM GSH and 1% Triton X-100,15%glycerol.

Gene Name	CRLF3 cytokine receptor-like factor 3 [Homo sapiens]
Official Symbol	CRLF3
Synonyms	CRLF3; cytokine receptor-like factor 3; CREME9; CYTOR4; cytokine receptor-like molecule 9; cytokine receptor related protein 4; cytokine receptor-related protein 4; type I cytokine receptor like factor; type I cytokine receptor-like factor p48; FRWS; p48.2; CREME-9; MGC20661;
Gene ID	51379
mRNA Refseq	NM_015986
Protein Refseq	NP_057070
UniProt ID	Q8IUI8
Chromosome Location	17q11.2
