

# Recombinant Staphylococcus aureus sei protein, His-SUMO-tagged

**Cat. No.** sei-3656S    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Staphylococcus aureus sei protein(A7X3T0)(1-242aa), fused to N-terminal His-SUMO tag, was expressed in E. coli.                                                                                                                                          |
| <b>Species</b>          | Staphylococcus aureus                                                                                                                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                               |
| <b>ProteinLength</b>    | 1-242aa                                                                                                                                                                                                                                                              |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.<br>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                                |
| <b>Molecular Mass</b>   | 43.9 kDa                                                                                                                                                                                                                                                             |
| <b>AA Sequence</b>      | MKKFKYSFILVFILLFNIKDLTYAQGDIGVGNLRNFYTKHDYIDLKGVTDKNLPIANQLE<br>FSTGTNDLISESNNWDEISKFKGKKLDIFGIDYNGPCKSKYMYGGATLSGQYLNSAR<br>KIPINLWVNGKHKTISTDKIATNKKLVTAQEIDVKLRRYLQEEYNIYGHNNTGKGKEYG<br>YKSKFYSGFNNGKVLFLHNLNEKSFSYDLFYTGDLPLVPSFLKIYEDNKIIESEKFHLDV<br>EISYVDSN |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                          |

**Storage**

Store at -20°C/-80°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
