

Recombinant Dog CTNNB1 Protein

Cat. No. CTNNB1-01D **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Dog CTNNB1 Protein without tag was expressed in E. coli.
Species	Dog
Source	E.coli
Description	Key downstream component of the canonical Wnt signaling pathway. In the absence of Wnt, forms a complex with AXIN1, AXIN2, APC, CSNK1A1 and GSK3B that promotes phosphorylation on N-terminal Ser and Thr residues and ubiquitination of CTNNB1 via BTRC and its subsequent degradation by the proteasome. In the presence of Wnt ligand, CTNNB1 is not ubiquitinated and accumulates in the nucleus, where it acts as a coactivator for transcription factors of the TCF/LEF family, leading to activate Wnt responsive genes.
