

# Recombinant Perennial ryegrass Lolp 1 protein, His&Myc-tagged

**Cat. No.** Lolp 1-3881P    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Perennial ryegrass Lolp 1 protein(P14946)(24-263aa), fused to N-terminal His tag and C-terminal Myc tag, was expressed in E. coli.                                                                                                                      |
| <b>Species</b>          | Perennial ryegrass                                                                                                                                                                                                                                                  |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                              |
| <b>ProteinLength</b>    | 24-263aa                                                                                                                                                                                                                                                            |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.<br>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                               |
| <b>Molecular Mass</b>   | 31.2 kDa                                                                                                                                                                                                                                                            |

**Storage**

Store at -20°C/-80°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
