

# Recombinant Human respiratory syncytial virus A G protein, His-SUMO-tagged

**Cat. No.** G-4265H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human respiratory syncytial virus A G protein(P03423)(67-298aa), fused to N-terminal His-SUMO tag, was expressed in E. coli.                                                                                                                   |
| <b>Species</b>          | Human respiratory syncytial virus A                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                     |
| <b>ProteinLength</b>    | 67-298aa                                                                                                                                                                                                                                                   |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.<br>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                      |
| <b>Molecular Mass</b>   | 41.3 kDa                                                                                                                                                                                                                                                   |

repeated freeze-thaw cycles.

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
