

## Recombinant Measles virus N protein, His-tagged

**Cat. No.** N-4304M    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Product Overview</b> | Recombinant Measles virus N protein(B8PZP3)(1-400aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                                                                                                                                                                                                           |
| <b>Species</b>          | Measles virus                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

**Storage**

Store at -20°C/-80°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
