

## Recombinant Baker's yeast FCY1 protein, His&Myc-tagged

**Cat. No.** FCY1-4365B    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Baker's yeast FCY1 protein(Q12178)(1-158aa), fused to N-terminal His tag and C-terminal Myc tag, was expressed in E. coli                                                                                                            |
| <b>Species</b>          | Yeast                                                                                                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                           |
| <b>ProteinLength</b>    | 1-158aa                                                                                                                                                                                                                                          |
| <b>Form</b>             | <p>If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.</p> <p>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.</p> |
| <b>Molecular Mass</b>   | 25.0 kDa                                                                                                                                                                                                                                         |
| <b>AA Sequence</b>      | <p>MVTGGMASKWDQKGMDIAYEEAALGYKEGGVPIGGCLINNKGDSVLGRGHNMRFQ</p> <p>KGSATLHGEISTLENCGRLEGKVYKDTTLYTTLSPCDMCTGAIIMYGIPRCVVGENVN</p> <p>FKSKGEKYLQTRGHEVVVVDDERCKKIMKQFIDERPQDWFEDIGE</p>                                                            |
| <b>Purity</b>           | Greater than 85% as determined by SDS-PAGE.                                                                                                                                                                                                      |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                   |

**Reconstitution**

Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%.
