

## Recombinant Cynomolgus monkey TPBG protein, His&Myc-tagged

Cat. No. TPBG-5075C    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                                                                                                               |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Cynomolgus monkey TPBG protein(Q4R8Y9)(35-355aa), fused to N-terminal His tag and C-terminal Myc tag, was expressed in HEK293.                                                                                                                    |
| Species          | Cynomolgus                                                                                                                                                                                                                                                    |
| Source           | HEK293                                                                                                                                                                                                                                                        |
| ProteinLength    | 35-355aa                                                                                                                                                                                                                                                      |
| Form             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol.<br>If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                         |
| Molecular Mass   | 39.9 kDa                                                                                                                                                                                                                                                      |
| Purity           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                   |
| Storage          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                |
| Reconstitution   | Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. |
