

Recombinant Human ACVRL1 Protein, His-tagged

Cat. No. ACVRL1-72H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human ACVRL1 Protein (Ser238-Arg479) with N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Ser238-Arg479
Description	This gene encodes a type I cell-surface receptor for the TGF-beta superfamily of ligands. It shares with other type I receptors a high degree of similarity in serine-threonine kinase subdomains, a glycine- and serine-rich region (called the GS domain) preceding the kinase domain, and a short C-terminal tail. The encoded protein, sometimes termed ALK1, shares similar domain structures with other closely related ALK or activin receptor-like kinase proteins that form a subfamily of receptor serine/threonine kinases. Mutations in this gene are associated with hemorrhagic telangiectasia type 2, also known as Rendu-Osler-Weber syndrome 2.
Form	Freeze-dried powder
Molecular Mass	Predicted Molecular Mass: 29.2 kDa
Purity	> 97%
Applications	Positive Control; Immunogen; SDS-PAGE; WB.

Stability	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 centigrade for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Storage	Avoid repeated freeze/thaw cycles. Store at 2-8 centigrade for one month. Aliquot and store at -80 centigrade for 12 months.
Storage Buffer	PBS, pH7.4, containing 0.01% SKL, 1 mM DTT, 5% Trehalose and Proclin300.
Reconstitution	Reconstitute in sterile water to a concentration of 0.1-1.0 mg/mL. Do not vortex.
