

# Recombinant Cynomolgus ICOSLG Protein, His-tagged, Alexa Fluor 555 conjugated

**Cat. No.** ICOSLG-1232CAF555    **Lot. No.** (See product label)

## SPECIFICATION

|                                     |                                                                                                                                                                                                                                        |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>             | Alexa Fluor 555 conjugated recombinant cynomolgus ICOSLG (XP_005548618.1) (Met1-Thr256) was expressed with a polyhistidine tag at the C-terminus.                                                                                      |
| <b>Species</b>                      | Monkey                                                                                                                                                                                                                                 |
| <b>Source</b>                       | HEK293                                                                                                                                                                                                                                 |
| <b>ProteinLength</b>                | 249                                                                                                                                                                                                                                    |
| <b>Form</b>                         | Lyophilized                                                                                                                                                                                                                            |
| <b>Molecular Mass</b>               | 28.1 kDa                                                                                                                                                                                                                               |
| <b>N-terminal Sequence Analysis</b> | Asp 19                                                                                                                                                                                                                                 |
| <b>Endotoxin</b>                    | < 1.0 EU/ µg of the protein as determined by the LAL method.                                                                                                                                                                           |
| <b>Purity</b>                       | > 95 % as determined by SDS-PAGE                                                                                                                                                                                                       |
| <b>Characteristic</b>               | Disulfide-linked homodimer<br>Labeled with Alexa Fluor 555 via amines<br>With an excitation and emission maximum of 555/565 nm, Alexa Fluor 555 can be efficiently excited using a 543 nm He-Ne laser line and detected under standard |

|                       |                                                                                                                                                                                         |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | TRITC/Cy3 filters.                                                                                                                                                                      |
| <b>Stability</b>      | Samples are stable for up to 12 months from date of receipt at -70 centigrade.                                                                                                          |
| <b>Storage</b>        | Store it under sterile conditions at -20 to-70 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.                      |
| <b>Storage Buffer</b> | Lyophilized from sterile PBS, pH 7.4, 5%-8% trehalose and mannitol.                                                                                                                     |
| <b>Reconstitution</b> | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.25 µg/µL. Centrifuge the vial at 4 centigrade before opening to recover the entire contents. |
| <b>Conjugation</b>    | Alexa Fluor 555                                                                                                                                                                         |

## GENE INFORMATION
