

## Recombinant Human EVI2A, His-tagged

**Cat. No.** EVI2A-12577H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                       |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human EVI2A protein, fused to His-tag, was expressed in E.coli and purified by Ni-sepharose.                                                              |
| <b>Species</b>          | Human                                                                                                                                                                 |
| <b>Source</b>           | E.coli                                                                                                                                                                |
| <b>ProteinLength</b>    | 1-236a.a.                                                                                                                                                             |
| <b>Storage</b>          | The protein is stored in PBS buffer at -20°C. Avoid repeated freezing and thawing cycles.                                                                             |
| <b>Storage Buffer</b>   | 1M PBS (58mM Na <sub>2</sub> HPO <sub>4</sub> , 17mM NaH <sub>2</sub> PO <sub>4</sub> , 68mM NaCl, pH8. ) added with 300mM Imidazole and 0.7% Sarcosyl, 15% glycerol. |

### GENE INFORMATION

|                        |                                                                                                                                     |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | EVI2A ecotropic viral integration site 2A [ Homo sapiens ]                                                                          |
| <b>Official Symbol</b> | EVI2A                                                                                                                               |
| <b>Synonyms</b>        | EVI2A; ecotropic viral integration site 2A; EVI2; protein EVI2A; EVDA; ecotropic viral integration site 2A protein homolog; EVI-2A; |
| <b>Gene ID</b>         | 2123                                                                                                                                |
