

# Recombinant Cynomolgus FGFR3 Protein, His-tagged, FITC conjugated

**Cat. No.** FGFR3-1224CF    **Lot. No.** (See product label)

## SPECIFICATION

|                                     |                                                                                                                                                                                            |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>             | FITC conjugated recombinant cynomolgus FGFR3 (XP_005554344.1) (Met1-Gly375) was expressed with a polyhistidine tag at the C-terminus. Cynomolgus and Rhesus FGFR3 sequences are identical. |
| <b>Species</b>                      | Monkey                                                                                                                                                                                     |
| <b>Source</b>                       | HEK293                                                                                                                                                                                     |
| <b>ProteinLength</b>                | 364                                                                                                                                                                                        |
| <b>Form</b>                         | Lyophilized                                                                                                                                                                                |
| <b>Molecular Mass</b>               | 39.5 kDa                                                                                                                                                                                   |
| <b>N-terminal Sequence Analysis</b> | Glu 23                                                                                                                                                                                     |
| <b>Endotoxin</b>                    | < 1.0 EU/ µg of the protein as determined by the LAL method.                                                                                                                               |
| <b>Purity</b>                       | > 95 % as determined by SDS-PAGE                                                                                                                                                           |
| <b>Characteristic</b>               | Disulfide-linked homodimer<br>Labeled with FITC via amines<br>Excitation source: 488 nm spectral line, argon-ion laser                                                                     |

|                       |                                                                                                                                                                                         |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | Excitation Wavelength: 488 nm<br>Emission Wavelength: 535 nm                                                                                                                            |
| <b>Stability</b>      | Samples are stable for up to 12 months from date of receipt at -70 centigrade.                                                                                                          |
| <b>Storage</b>        | Store it under sterile conditions at -20 to -70 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.                     |
| <b>Storage Buffer</b> | Lyophilized from sterile PBS, pH 7.4, 5%-8% trehalose and mannitol.                                                                                                                     |
| <b>Reconstitution</b> | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.25 µg/µL. Centrifuge the vial at 4 centigrade before opening to recover the entire contents. |
| <b>Conjugation</b>    | FITC                                                                                                                                                                                    |

## GENE INFORMATION

|                        |                                                                   |
|------------------------|-------------------------------------------------------------------|
| <b>Gene Name</b>       | FGFR3 fibroblast growth factor receptor 3 [ Macaca fascicularis ] |
| <b>Official Symbol</b> | FGFR3                                                             |
| <b>Synonyms</b>        | fibroblast growth factor receptor 3                               |
| <b>Gene ID</b>         | 102128947                                                         |
