

Recombinant Human IL3RA Protein, hFc-tagged, FITC conjugated

Cat. No. IL3RA-121HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	FITC conjugated recombinant human IL3RA protein (Met1-Arg305) was fused to human IgG1 Fc tag at C-terminus and expressed in HEK293 Cells.
Species	Human
Source	HEK293
ProteinLength	525
Description	Interleukin-3 receptor subunit alpha, also known as IL-3 receptor subunit alpha, IL-3R-alpha, CD123, and IL3RA, is a single-pass type I membrane protein which belongs to the type I cytokine receptor family and Type 5 subfamily. The specific alpha subunit of the interleukin-3 receptor (IL-3Ralpha, CD123) is strongly expressed in various leukemic blasts and leukemic stem cells and seems to be an excellent target for the therapy of leukemias. The WSXWS motif of IL3RA appears to be necessary for proper protein folding and thereby efficient intracellular transport and cell-surface receptor binding. The box one motif of IL3RA is required for JAK interaction and/or activation. IL3RA represents a unique marker for primitive leukemic stem cells. Targeting of IL3RA may be a promising strategy for the preferential ablation of AML cells. Aberrant IL3RA expression is a good marker for monitoring of minimal residual disease. IL3RA is strongly expressed in various leukemic blasts and leukemic stem cells and seems to be an excellent target for the therapy of leukemias. Recent studies have shown that interleukin-3 receptor alpha (CD123) is highly

expressed on leukemia stem cells of patients with acute myeloid leukemia, and is correlated with tumor load and poor prognosis. CD123 was highly expressed in the bone marrow of the patients with myelodysplastic syndrome (MDS), significantly correlated with the proportion of bone marrow blasts, and thus might be the marker of MDS malignant clone. IL3RA is also a useful new marker for distinguishing B-cell disorders with circulating villous lymphocytes as its expression is characteristic of typical hairy cell leukemia (HCL) with high sensitivity and specificity.

Form	Lyophilized
Molecular Mass	59.8 kDa
N-terminal Sequence Analysis	Thr 19
Endotoxin	< 1.0 EU/ µg protein as determined by the LAL method.
Purity	> 95 % as determined by SDS-PAGE
Characteristic	Disulfide-linked homodimer Labeled with FITC via amines Excitation source: 488 nm spectral line, argon-ion laser Excitation Wavelength: 488 nm Emission Wavelength: 535 nm
Stability	Samples are stable for up to 12 months from date of receipt at -20 to -80 centigrade.
Storage	Store it under sterile conditions at -20 to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Storage Buffer	Lyophilized from sterile PBS, pH 7.4.

Shipping	Shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.
-----------------	--

Conjugation	FITC
--------------------	------

GENE INFORMATION

Gene Name	IL3RA
------------------	-------

Official Symbol	IL3RA
------------------------	-------

Synonyms	IL3R; CD123; IL3RX; IL3RY; IL3RAY; hIL-3Ra
-----------------	--

Gene ID	3563
----------------	------

mRNA Refseq	NM_002183
--------------------	-----------

Protein Refseq	NP_002174
-----------------------	-----------

MIM	308385
------------	--------

UniProt ID	P26951
