

Recombinant Rat Prom1 Protein, Fc-tagged, FITC conjugated

Cat. No. Prom1-120RF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	A DNA sequence encoding the rat PROM1 (F1MAN1) (Asn171-Tyr424) (FITC conjugated) was with the Fc region of mouse IgG1 at the N-terminus.
Species	Rat
Source	HEK293
ProteinLength	490
Description	CD133, also known as PROM1 and Prominin 1, is a pentaspan transmembrane glycoprotein which belongs to the prominin family. It localizes to membrane protrusions and is often expressed on adult stem cells. CD133 is known to play a role in maintaining stem cell properties by suppressing differentiation. CD133 binds cholesterol in cholesterol-containing plasma membrane microdomains. It is proposed to play a role in apical plasma membrane organization of epithelial cells. CD133 is also involved in regulation of MAPK and Akt signaling pathways. Mutations in PROM1 gene have been shown to result in retinitis pigmentosa and Stargardt disease. PROM1 gene is expressed from at least five alternative promoters that are expressed in a tissue-dependent manner. Expression of this gene is also associated with several types of cancer.
Form	Lyophilized
Molecular Mass	The recombinant rat PROM1 comprises 490 amino acids and predicts a molecular mass of 55.1 kDa. The apparent molecular mass of the recombinant protein is

	approximately 67 and 34 kDa in SDS-PAGE under reducing conditions due to glycosylation.
N-terminal Sequence Analysis	Asp
Endotoxin	< 1.0 EU/ µg of the protein as determined by the LAL method.
Purity	(79.2+14.5) % as determined by SDS-PAGE
Characteristic	Disulfide-linked homodimer Labeled with FITC via amines Excitation source: 488 nm spectral line, argon-ion laser Excitation Wavelength: 488 nm Emission Wavelength: 535 nm
Stability	Samples are stable for up to 12 months from date of receipt at -70 centigrade.
Storage	Store it under sterile conditions at -70 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Storage Buffer	Lyophilized from sterile PBS, pH 7.4.
Conjugation	FITC

GENE INFORMATION

Gene Name	Prom1 prominin 1 [Rattus norvegicus (Norway rat)]
Official Symbol	Prom1

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127
