

# Recombinant Rat Tnfsf9 Protein, Fc-tagged, FITC conjugated

**Cat. No.** Tnfsf9-7445RF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | FITC conjugated recombinant Rat Tnfsf9 (Q80WE6) (Pro106-Gly308), fused with the Fc region of human IgG1 at the N-terminus, was produced in Human Cell.                                                                                     |
| <b>Species</b>          | Rat                                                                                                                                                                                                                                        |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                     |
| <b>ProteinLength</b>    | 463                                                                                                                                                                                                                                        |
| <b>Form</b>             | Lyophilized                                                                                                                                                                                                                                |
| <b>Molecular Mass</b>   | The recombinant rat TNFSF9 comprises 463 amino acids and predicts a molecular mass of 50.9 kDa. The apparent molecular mass of the recombinant protein is approximately 61 kDa in SDS-PAGE under reducing conditions due to glycosylation. |
| <b>Endotoxin</b>        | < 1.0 EU/ µg of the protein as determined by the LAL method.                                                                                                                                                                               |
| <b>Characteristic</b>   | Disulfide-linked homodimer<br>Labeled with FITC via amines<br>Excitation source: 488 nm spectral line, argon-ion laser<br>Excitation Wavelength: 488 nm<br>Emission Wavelength: 535 nm                                                     |
| <b>Stability</b>        | Samples are stable for up to 12 months from date of receipt at -70 centigrade.                                                                                                                                                             |

|                       |                                                                                                                                                                           |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>        | Store it under sterile conditions at -20 to -70 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.       |
| <b>Storage Buffer</b> | Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4                                                                                                                |
| <b>Reconstitution</b> | It is recommended that sterile water be added to the vial to prepare a stock solution. Centrifuge the vial at 4 centigrade before opening to recover the entire contents. |
| <b>Conjugation</b>    | FITC                                                                                                                                                                      |

## GENE INFORMATION

|                        |                                                                                   |
|------------------------|-----------------------------------------------------------------------------------|
| <b>Gene Name</b>       | Tnfsf9 tumor necrosis factor (ligand) superfamily, member 9 [ Rattus norvegicus ] |
| <b>Official Symbol</b> | Tnfsf9                                                                            |
| <b>Gene ID</b>         | 353218                                                                            |
| <b>mRNA Refseq</b>     | NM_181384                                                                         |
| <b>Protein Refseq</b>  | NP_852049                                                                         |
