

## Recombinant Rat Podxl Protein, His-tagged

**Cat. No.** Podxl-1957R    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                 |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rat Podxl Protein (Gly408-Leu485) with N-His tag was expressed in E. coli.                                                                                                                                                                          |
| <b>Species</b>          | Rat                                                                                                                                                                                                                                                             |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                          |
| <b>ProteinLength</b>    | Gly408-Leu485                                                                                                                                                                                                                                                   |
| <b>Description</b>      | Involved in glomerular visceral epithelial cell development and negative regulation of cell adhesion. Located in apical plasma membrane; cell body; and slit diaphragm. Orthologous to human PODXL (podocalyxin like).                                          |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                                                             |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 12.8 kDa<br>Accurate Molecular Mass: 20 kDa                                                                                                                                                                                           |
| <b>Purity</b>           | > 90%                                                                                                                                                                                                                                                           |
| <b>Applications</b>     | Positive Control; Immunogen; SDS-PAGE; WB.                                                                                                                                                                                                                      |
| <b>Stability</b>        | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 centigrade for 48h, and no obvious degradation and precipitation were observed. The loss rate is |
