

Recombinant Human IGHM Protein, His-tagged

Cat. No. IGHM-2284H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human IGHM Protein (Gly1-Tyr453) with a N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Gly1-Tyr453
Description	Constant region of immunoglobulin heavy chains. Immunoglobulins, also known as antibodies, are membrane-bound or secreted glycoproteins produced by B lymphocytes. In the recognition phase of humoral immunity, the membrane-bound immunoglobulins serve as receptors which, upon binding of a specific antigen, trigger the clonal expansion and differentiation of B lymphocytes into immunoglobulin-secreting plasma cells. Secreted immunoglobulins mediate the effector phase of humoral immunity, which results in the elimination of bound antigens.
Form	Freeze-dried powder
Molecular Mass	Predicted Molecular Mass: 53.1 kDa Accurate Molecular Mass: 59 kDa
Endotoxin	<1.0 EU per 1g (determined by the LAL method).
Purity	> 90%

 45-1 Ramsey Road, Shirley, NY 11967, USA

Applications	Positive Control; Immunogen; SDS-PAGE; WB.
Stability	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 centigrade for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Storage	Avoid repeated freeze/thaw cycles. Store at 2-8 centigrade for one month. Aliquot and store at -80 centigrade for 12 months.
Storage Buffer	20mM Tris, 150mM NaCl, pH8.0, containing 1mM EDTA, 1mM DTT, 0.01% SKL, 5% Trehalose and Proclin300.
Reconstitution	Reconstitute in 20mM Tris, 150mM NaCl (pH8.0) to a concentration of 0.1-1.0 mg/mL. Do not vortex.

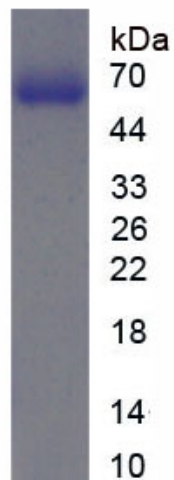

GENE INFORMATION

Gene Name	IGHM
Official Symbol	IGHM
Synonyms	IGHM
UniProt ID	P01871
