

## Recombinant Full Length Human FLNA protein

**Cat. No.** FLNA-4155HFL    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Human FLNA protein, fused with C-terminal Flag tag, was expressed in mammalian cells.               |
| <b>Species</b>          | Human                                                                                                                       |
| <b>Source</b>           | Mammalian Cells                                                                                                             |
| <b>ProteinLength</b>    | 1-2647 a.a.                                                                                                                 |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                       |
| <b>Molecular Mass</b>   | 280.7 kDa                                                                                                                   |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                 |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                                            |
| <b>Shipping</b>         | The product is shipped with dry ice or equivalent. Upon receipt, store it immediately at the temperature recommended below. |
| <b>Full Length</b>      | Full L.                                                                                                                     |

### GENE INFORMATION

|                  |                                        |
|------------------|----------------------------------------|
| <b>Gene Name</b> | FLNA filamin A, alpha [ Homo sapiens ] |
|------------------|----------------------------------------|
