

Native Arachis hypogaea Lectin (PNA), Separopore® 4B OnePASS™ Column-Conjugated

Cat. No. PNA-589P **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Peanut Arachis hypogaea Lectin (PNA) - Separopore® 4B OnePASS™ Column Hazardous Shipping: Non-hazardous
Species	Peanut
Source	Peanut
Description	Arachis hypogaea agglutinin (PNA) is purified by affinity chromatography and is consisting of four subunits of approximately 27,000 each. This lectin has an isoelectric point between pH 5. 5 and pH 6. 5. Although extracts of Arachis hypogaea do not agglutinate untreated or trypsin-treated human erythrocytes, PNA has been known to agglutinate neuraminidase-treated human red blood cells. PNA may be used for clinical determination of T-polyagglutinability of erythrocytes and probing cell membranes of normal and malignant cells. This lectin can be of use in characterization of tumor-specific antigens on the surface of malignant cells. It can be employed in the fractionation of stem cells in mice for use in bone marrow transplantation across histocompatibility barriers. Arachis hypogaea Lectin (PNA) OnePass™ column are standard PNA matrix prepacked in a column which can be used via gravity flow or as a spin column to rapidly separate bound and passthrough materials.
Purity	High Purity Grade

 Tel: 1-631-559-9269 1-516-512-3133
