Native Dolichos biflorus Lectin (DBA), Separopore® 4B MicroPass™-Conjugated

Cat. No. DBA-612H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Native Horse gram Dolichos biflorus Lectin (DBA) - Separopore® 4B MicroPass™ Hazardous Shipping: Non-hazardous
Species	Horse gram
Source	Horse gram
Description	Dolichos biflorus agglutinin (DBA) is isolated from horse gram and purified by affinity chromatography. DBA is a glycoprotein with a molecular weight of about 111,000 and consists of 4 subunits of equal size. This lectin has an isoelectric point between pH 4. 6 and pH 5. 5. DBA has been used as a general marker of developing renal collecting ducts, which can then be used to establish secretion status in blood group A individuals by hemagglutination inhibition and for detecting blood typing. DBA is over thousand times more active in agglutinating blood group A1 cells versus A2 cells, and is used to distinguish these blood types in routine serology applications, and has potential applications in examining tumors which affect the levels of blood group substances. Reconstitute with sterile buffer. Calcium, manganese, magnesium, and zinc ions are required for binding. MicroPass™ microcolumns are prepared by conjugating Separopore® 4B with affinity purified (AffyPure™) Dolichos biflorus Lectin (DBA). These microcolumns are used for MS and proteomic analysis to analyze of <100µL samples.
Storage	At 2-8 centigrade.
