

Native Dolichos biflorus Lectin (DBA), Separopore® 4B OnePASS™ Column-Conjugated

Cat. No. DBA-613H **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Native Horse gram Dolichos biflorus Lectin (DBA) - Separopore® 4B OnePASS™
Column
Hazardous Shipping: Non-hazardous

Species

Horse gram

Source

Horse gram

Description

Dolichos biflorus agglutinin (DBA) is isolated from horse gram and purified by affinity chromatography. DBA is a glycoprotein with a molecular weight of about 111,000 and consists of 4 subunits of equal size. This lectin has an isoelectric point between pH 4.6 and pH 5.5. DBA has been used as a general marker of developing renal collecting ducts, which can then be used to establish secretion status in blood group A individuals by hemagglutination inhibition and for detecting blood typing. DBA is over thousand times more active in agglutinating blood group A1 cells versus A2 cells, and is used to distinguish these blood types in routine serology applications, and has potential applications in examining tumors which affect the levels of blood group substances. Reconstitute with sterile buffer. Calcium, manganese, magnesium, and zinc ions are required for binding. Dolichos biflorus Lectin (DBA) OnePASS™ Spin Column are standard Concanavalin A Lectin (Con A) matrix prepacked in a column which can be used via gravity flow or as a spin column to rapidly separate bound and passthrough materials.
