

## Recombinant HHV-4 EBNA2 protein, His&Myc-tagged

Cat. No. EBNA2-5781H    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                               |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant HHV-4 EBNA2 protein(Q69022)(247-454aa), fused to N-terminal His tag and C-terminal Myc tag, was expressed in Yeast.                                                                                                                               |
| <b>Species</b>          | HHV4                                                                                                                                                                                                                                                          |
| <b>Source</b>           | Yeast                                                                                                                                                                                                                                                         |
| <b>ProteinLength</b>    | 247-454aa                                                                                                                                                                                                                                                     |
| <b>Form</b>             | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |
| <b>Molecular Mass</b>   | 25.9 kDa                                                                                                                                                                                                                                                      |
| <b>Purity</b>           | >85% (SDS-PAGE)                                                                                                                                                                                                                                               |
| <b>Storage</b>          | Store at -20°C/-81°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                |
| <b>Reconstitution</b>   | Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 51%. |
| <b>SDS-PAGE</b>         |                                                                                                                                                                                                                                                               |
