

Recombinant Human TARDBP Protein, GST-tagged

Cat. No. TARDBP-116H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TARDBP Protein, fused to GST-tag, was expressed in E.coli.
Species	Human
Source	E.coli
Description	HIV-1, the causative agent of acquired immunodeficiency syndrome (AIDS), contains an RNA genome that produces a chromosomally integrated DNA during the replicative cycle. Activation of HIV-1 gene expression by the transactivator Tat is dependent on an RNA regulatory element (TAR) located downstream of the transcription initiation site. The protein encoded by this gene is a transcriptional repressor that binds to chromosomally integrated TAR DNA and represses HIV-1 transcription. In addition, this protein regulates alternate splicing of the CFTR gene. A similar pseudogene is present on chromosome 20.
Form	Supplied as a 0.2 µm filtered solution in PBS, pH8.0.
Molecular Mass	~56.7 kDa
