

Recombinant Human TSHR Protein, His-tagged

Cat. No. TSHR-126H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TSHR Protein, fused to His-tag, was expressed in E. coli.
Species	Human
Source	E.coli
Description	The protein encoded by this gene is a membrane protein and a major controller of thyroid cell metabolism. The encoded protein is a receptor for thyrothropin and thyrostimulin, and its activity is mediated by adenylate cyclase. Defects in this gene are a cause of several types of hyperthyroidism. Three transcript variants encoding different isoforms have been found for this gene.
